

Foam Soap Sensory Activity

What you will need:

- A plastic tub/basin.
- Foam soap.
- Sensory resources to add for exploration- i.e. foam balls.

How to make:

- Scoosh your foam soap into a basin/large tub or alternatively you could do directly on a tabletop covered with cling film.
- Let your little one explore the soft fluffy material.
- Add glitter, food colouring, foam balls or any other sensory material your child would like to add and would enjoy exploring.
- If you are worried your little one may put foam in their mouths you can cover the whole thing with cling film, and they can still explore and achieve a sensory experience.
